

# ***Simplification of Large MCAD Equipment Models for Plant and Process***

## **CADfix PPS**

### **Support**

#### **Import**

Bundle:

- ACIS SAT
- DWG
- Parasolid
- STEP

Add-on options:

- CATIA
- Creo
- FBX
- Inventor
- JT Open
- NX
- OBJ
- SOLIDWORKS
- STL

#### **Export**

Bundle:

- ACIS SAT
- DWG
- Parasolid
- STEP

Add-on options:

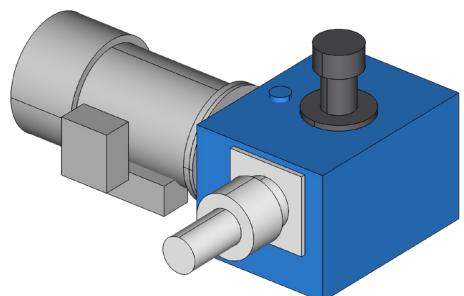

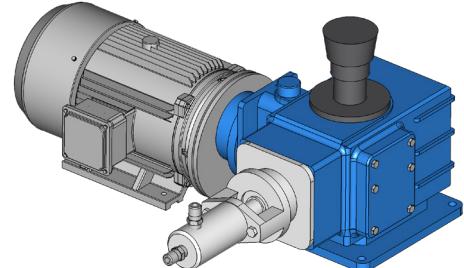

- FBX
- JT Open
- OBJ
- STL
- VRML

The CADfix Plant and Process Simplification (PPS) solution automates the simplification of 3D mechanical CAD models of large equipment assemblies. Orders of magnitude in file size reduction can be achieved ahead of integration of the equipment models into 3D plant and process design systems.

Users of process engineering design systems can save days of non-productive geometry handling, increase efficiency and integrate MCAD models more rapidly by employing CADfix PPS automated simplification.

Plant designers with no MCAD modelling experience can quickly and easily:

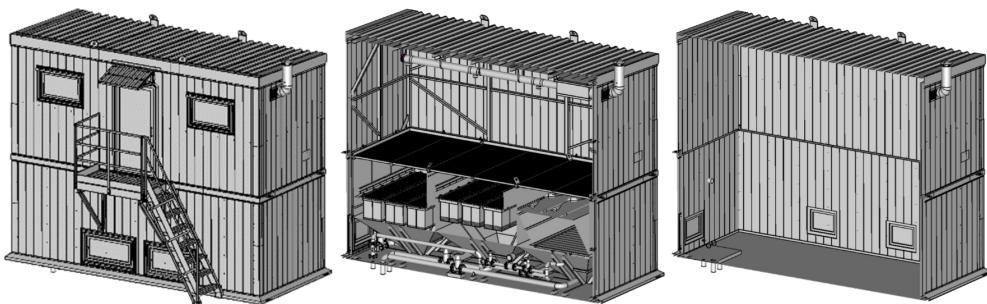

- Remove unwanted small parts, including nuts, bolts and washers
- Remove unnecessary CAD features such as holes, fillets, logos and text
- Remove invisible internal parts
- Simplify complex parts to basic shapes, such as cylinders and bounding boxes

CADfix PPS enables companies to complete projects and get to commissioning faster, realizing commercial bonuses and increased profit margins.

#### **CADfix PPS Benefits:**

|  |   |
|--|---|
| <ul style="list-style-type: none"><li>• Significantly reduce file size</li><li>• Eliminate import failures</li><li>• Avoid CAD rework</li><li>• Produce legible models</li></ul> | <ul style="list-style-type: none"><li>• Eliminate system hangs</li><li>• Reduce lead time</li><li>• Protect intellectual property</li><li>• Greater plant design system stability</li></ul> |
|--|---|

Automatic hidden internal detail removal offers significant data reductions.

# *Simplification of Large MCAD Equipment Models for Plant and Process*

## CADfix PPS

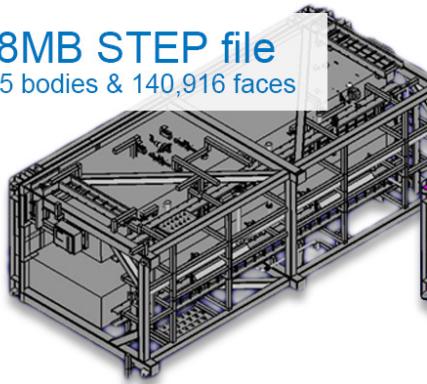

### Benefits

- Intelligent MCAD model simplification
- File size reduction of up to 70%
- Fast integration of complex equipment assemblies
- Save time and get to commissioning faster

### Skid assembly: 96% reduction in 20 minutes

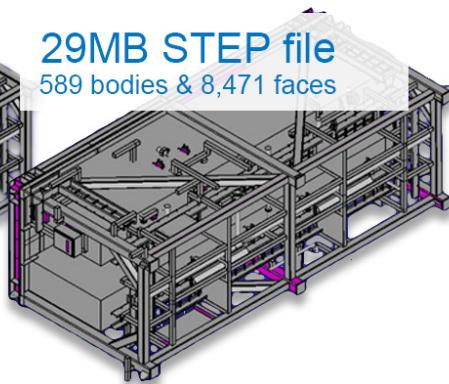

**798MB STEP file**

3,115 bodies & 140,916 faces

**29MB STEP file**

589 bodies & 8,471 faces

### Stair & floor assembly: 93% reduction in 20 minutes

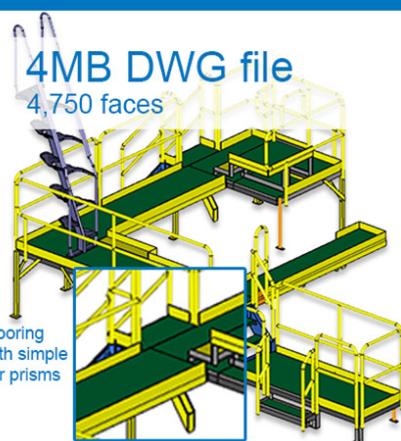

**72MB DWG file**

26,000 faces

**4MB DWG file**

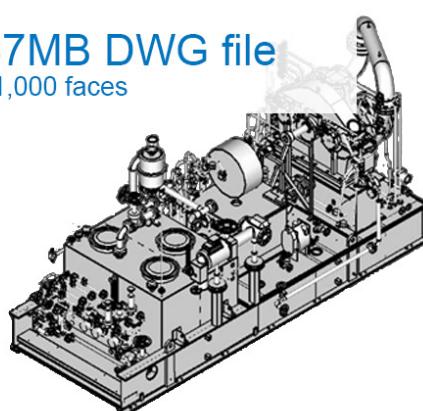

4,750 faces

### Equipment assembly: 90% reduction in 25 minutes

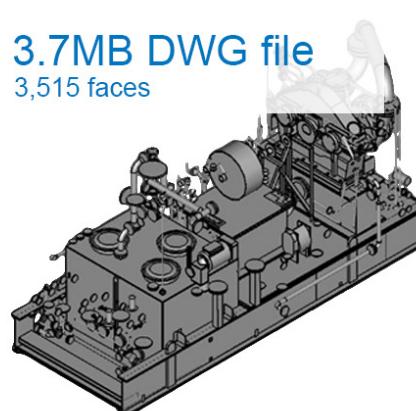

**37MB DWG file**

61,000 faces

**3.7MB DWG file**

3,515 faces

### About ITI, a Wipro company

ITI is the global leader providing reliable interoperability, validation, and migration solutions for product data and related systems.

ITI solves complex product data interoperability problems so the world's leading manufacturers can focus on making great products.

ITI is a wholly owned US-based subsidiary of Wipro, Ltd, within the Industrial & Engineering Services (IES) business. IES provides customers with a platform to innovate and engineer the next generation of products and platforms at scale.
